

About Sophienia Cosmetic brushes

Sophieniacosmetic brushes is an internationally recognized quality makeup brushes supplier with a decade of accumulated experience in crafting customized makeup brushes and brush kits. Our products are made to last longer and give you the most satisfactory results. We source the raw materials with customization in mind and strive to deliver the best. Located in Dong guan and Lu yi County, Henan province, we have gained the trust of our domestic and international customers. Through constant innovation and control of our supply chain, we can match our customer's expectations in price and quality. We constantly aspire to add creative and artistic designs to our collection.

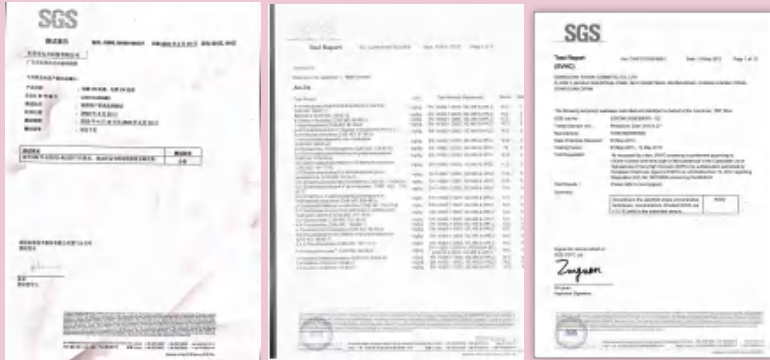

Address 1: No. 9, Shanghe Road, Qinghuang Village, Qingxi Town, Dongguan City, Guangdong Province, China. (Zip code:523650)
Address 2: Building 3&4, No.189 Zhiming Road, Luyi County, Zhoukou City, Henan Province, China. (Zip Code: 477200)

The branch is located in Luyi County, Henan Province.

Well-selected materials:

1. Self-sufficient natural hair. You can choose from high-quality & diverse synthetic hair.
2. The ferrule is made of nickel-plated copper and thick aluminum, without incompleteness and scratches.
3. Handle wood, bamboo, metal, plastic, acrylic, and other materials. The use of water-based paint ensures that each brush is ECO-friendly.

Vintage craft handmade

Whether it is the production of goat hair or the production of makeup brushes, we use pure hand-made products. We believe in the convenience that technology brings us, but We pay more attention to the practicality and quality of our products.

Our showroom & work area

New Synthetic Fibers

Collagen is the main protein in the connective tissue of the human body. It ensures the integrity, elasticity, and strength of the skin, cartilage, and bones. Adding collagen molecules to synthetic fibers gives synthetic fibers the characteristics & advantages of natural hair. The bristles are soft and fluffy & will not cause allergic reactions.

Nano-fibers are made of nano-synthetic technology & anti-bacterial nano-materials. Advantages: high softness and good antibacterial properties, with rich hair, scales comparable to natural hair, and enhanced the powdering ability of the brush.

Bamboo charcoal is known as the "black diamond," made from bamboo. Use pure oxygen high temperature & nitrogen to block delayed combustion extraction. The synthetic fiber blended with bamboo charcoal has the characteristics of moisture absorption, breathability, antibacterial and antibacterial, and ECO-friendly.

Bionic fiber is a kind of artificial synthetic fiber that simulates luxurious natural hair. Bionic fiber can imitate the characteristics of various natural hair. The bionic fiber has artificial hair scales and good toughness, convenient for daily use and cleaning makeup brushes.
